COMPARE PANEL FEATURES

The adjacent chart allows you to compare the various features, options and benefits of different standing seam metal panel systems. Select the seam height, panel width, options, locking system, gauge and engineering suited best for your job.

CLASSIC STYLING

Standing Seam metal roofing is one of the oldest and most practical roofing solutions. It's classic look enhances the roofline of virtually all architecture styles. It produces dramatic shadow lines that run continuously from ridge to eave accenting the pitch and plane of every roof angle. Panels may be roll formed at your jobsite or in our factories.

DURABILITY

The SL-100 is available in over 28 colors featuring COOL ROOF Reflective paint system. This system offers an incredible 30-year coating performance warranty.*

COOL ROOF

Our reflective paint features full 70% PVDF (Polyvinylidene fluoride) or Kynar 500® or Hylar® 5000 or Fluoropon® reflective pigmentation technology to deliver highly efficient cooling performance. Testing data supports reflectivity of up to 70% of the sun's energy and reduces cooling costs by 20%.** Now you can have darker roof colors and still enjoy energy savings.

* For complete guide specifications installation details, and warranty information visit our website: www.CustomBiltMetals.com

** Oak Ridge National Laboratory (ORNL)

MATERIALS:

Prefinished or Bare Zincalume®/Galvalume® or G-90 Galvanized Steel in 24 & 26 gauge Copper-16oz. or 20oz. (non-standard) Prefinished Aluminum in .032 Thickness.

PAINT AND COLOR:

Cool Roof Reflective Paint utilizing full 70% PVDF (Polyvinylidene fluoride) or Kynar 500® or Hylar® 5000 or Fluoropon® technology in over 28 colors. See architectural color selection chart.

SPECIFICATIONS:

Self-locking standing seams 1" high with a panel width of 12" or 16" (Other widths available as non-standard).

OPTIONAL STYLES:

Stiffening Ribs or Striations (ask for details)
